23 Days SFM Master Study plan

Steps to Prepare subject during these days:

For Theory:

- Finally appear for test with full confidence & positive mindset.

23 Days SFM Master Study plan

For Practical Chapters:

If you have done chapter conceptually good by self or with any faculty's lectures you can directly start practicing from Question Bank or ICAI Study Material else you can See the Revision Videos on YouTube @ [PRO GENIUS channel](#).

It is advisable to use formula book along with practicing as it help you to get speed & confidence.

23 Days SFM Master Study plan

Practise after keeping 3-4 hrs aside

Use ABC Analysis

Just quickly go through C Type Questions once

For B type Questions practice & sort out the questions which you will revise at the last day of exam & if you need to revise only some specific point of any sum please it marked to save your time

& Practice A category questions very well & also sort questions

[Hint for No. of Questions to be selected for Exam day revision:

You should refer LDR available in free resources section at website to understand time available for each chapter during exam day & select No. of questions for last day according to time you take to revise question of that chapter

Eg. For Chapter you have 1.5 hour on day of exam i.e.90 min & you take average 5 min to revise question so max question you should select for exam day will be 18 but advisable to keep it around 15 & if you take 7 – 8 per question you can calculate no. of sums accordingly.]

Use of 4 hrs kept aside

For 1 and half hour or for 2 hours pick the sums randomly and practice it without referring solution.

Analyse & prepare your weak questions for remaining time out of these 3-4 hours.
